Highlights

Seasoned leader, wireless visionary and product builder with a 20-year track record of driving innovation in wireless engineering, smartphone systems design, testing, product management, and technical program management. Passionate about empowering people and businesses through technology.

An innovative, charismatic, and decisive leader with strong business acumen, Proven track record of building high-performing teams, crafting winning strategies, and launching industry-defining products. I drive innovation with 30+ patents, cultivate collaborative environments, and earn the lasting respect of my peers.

Public Speaking

Delivered over 12 [pep talks](#) on technology to engineering students at BITS Pilani and SRM Universities, resulting in a 15% increase in student participation in hackathons and tech workshops : [Link here](#)

Endorsements

Recommendations from industry experts, leaders and ex-colleagues through LinkedIn : [Link here](#)

Career Evolution [Google](#) • [Pixel Ecosystem](#) • [United States](#) • [2021 - Present](#)

Global Head • Carrier Engineering and Product Management • Americas and Asia Pacific

- ① I launched the first [5G services](#) for Google Pixel devices in Singapore and India, beating iPhone to the market. I also enabled 4G Voice and IMS services for [40+ carriers in Southeast Asia](#), using creative solutions and a tight budget.
- ② As Regional Head, spearheading Pixel portfolio's tech readiness and expansion into North American, South American markets and carriers, forging strategic partnerships and defining the product vision and strategy. [Attained 27% growth](#).
- ③ I also oversee a [\\$9 million annual budget](#), coordinated engineering development, and identified unique wireless features to differentiate our products and ensure quality deployment. [Saved \\$2.2 million in 2023](#) by optimizing test plans.
- ④ I established strong relationships with American carriers, and drove the technology roadmap for cutting-edge 3GPP features such as 5G mmW, CBRS, eSIM, DSDS, VoNR and more. Also launched solutions for [B2B and B2C markets](#).
- ⑤ Successfully navigating the complex landscape of carrier certifications [PTCRB](#), [GCF](#) and [CTIA](#) for every Pixel device.
- ⑥ Motivated team members to take decisions, instilling a culture of responsibility. Leveraged the diverse skills and perspectives within the team to achieve superior results, fostering a collaborative environment and knowledge sharing. This enabled successful launches of [Google Pixel Smartphones](#), [Tablets](#), [Smart Watches](#), and [FitBit devices](#).

[Amazon](#) • [Lab126](#) • [Southeast Asia and India](#) • [2019 - 2021](#)

Regional Head • Launch Technical Program Manager • FireTV Products

- ① As a Launch TPM, I received the prestigious [Fire TV Star](#) award for resolving critical issues in unreleased FireTV products by working with xFN teams and delivered them with high quality [a week before the cutoff](#).
- ② Spearheaded the launch of multiple FireTV products, leading cross-functional engineering teams from concept to market. Managed complex timelines and budgets, delivered high-quality FireTV products with [6% cost savings in 2020](#).
- ③ Pioneered the integration of [Fire TV Edition into rear-seat entertainment systems](#) across major auto manufacturers, collaborating closely with Tier-1 system integrators.
- ④ Led the launch of the first [Fire TV Alexa Voice Remote with Partner Buttons](#), revolutionizing the Fire TV Stick user experience with enhanced convenience and brand integration, achieving [customer ratings above 4 stars](#).
- ⑤ Orchestrated the launch of Amazon's [first Fire TV Edition](#) smart televisions for Indian markets.
- ⑥ I define projects, collect requirements, schedule, send regular updates to the exec-team, review detailed functional/performance test specifications, coordinate efforts per scope and deploy new features sets on time with optimal quality.

[Apple Inc](#) • [Wireless Systems Engineering](#) • [Singapore and USA](#) • [2014 - 2018](#)

APAC Regional Engineering Lead • iPhone • iPad • Apple Watch

- ① Co-invented 30+ patents, and US granted two wireless patents [US10642385B1](#) and [USP34897AP1](#) in 2020 and 2021 respectively. I was also honouree of [Hardware Innovation Award](#) in 2016 for innovative Proof of Concept development.
- ② As a leader in Apple's wireless technology division, I have mentored and steered highly skilled teams across diverse disciplines, driving the seamless connectivity and [regulatory compliance of wireless Apple products in APAC Market](#).
- ③ [Handled design and OTA evaluation](#) activities of future iPhones, iPads and Apple Watch both in lab and in real world.
- ④ Spearheaded "Ultra-Confidential" projects, driving the integration of cutting edge technologies into Apple ecosystem.
- ⑤ Drove systems design and field test teams; includes very early stage hardware assessment and in the later stage; I lead the 3GPP protocol conformance and setting OTA [performance KPI metrics for network operators](#) across the globe.
- ⑥ Expertise in deep-dive analysis of 3GPP data throughput issues, SIP errors, VoLTE: MOS, jitter and latency measurements in various mobility conditions. Pioneer in 3GPP log analysis, reporting bugs and propose H/W changes.

MediaTek Inc • Singapore • 2018 - 2019

Regional Director • Carrier Engineering and Solutions • APAC • 12 Countries

- ⌚ Envision the future 5G Modems/SoCs, [build roadmaps and steer xFN teams](#) towards delivery.
- ⌚ Responsible for validation planning, device certification and clearing state regulations of [cellular chipsets and SoCs](#).
- ⌚ Drive development and collateral execution of [new 3GPP features](#) like RCS, VoWiFi, eSIM, LTE-U and Device lock.
- ⌚ Represent MTK brand at OEM product launches (Oppo, Vivo, Nokia and Sony) in APAC region.

Samsung Electronics Research • South Korea • 2013 - 2014

LTE Solutions and IOT Smart Labs • Assistant Manager

- ⌚ I owned and led IOT team and lab activities to verify [LTE R10 features](#) with various LTE flagship handsets.
- ⌚ Design, development and testing of VoLTE, SPS, CQI, TPC, QoS, CA, CSFB and SRVCC with various eNBs.
- ⌚ [LTE Smart Labs](#): I established this lab to compute the performance of OTT applications, percentage of signalling overhead added by each app, impact on network performance to improve smartphone's battery consumption cycle.

Broadcom Inc • LTE Modem Engineering • India and USA • 2009 - 2013

Principal Engineer • Tech Lead • Modem Software Integration and Testing

- ⌚ Achieved [Star Performer Award](#) twice in 2010 and 2012, for successful Modem Integration. Represented Broadcom at [Telecom Summit 2012](#), I showcased Broadcom's LTE Modems to an international audience.
- ⌚ Lead the activities of [LTE chip bring-up](#), F/W and S/W integration and conformance of 3GPP R9/R10 features.
- ⌚ Hands-on experience with GCF and PTCRB verification, RF Conformance and operator's conformance suites.
- ⌚ Chief Engineer for firmware, protocol, DL Sensitivity, UL TPC, throughput performance, BLER, CQI and HARQ.
- ⌚ Hands-on expertise in [IOT testing](#), [LTE drive tests](#) with Ericsson eNB over Verizon and AT&T networks in California.
- ⌚ Built an Automation team to reduce the repetitive manual testing efforts, increased team's productivity and efficiency.

Cisco Systems • Wireless Division • India • 2006 - 2009

Senior WiMax Systems Engineer • Performance Validation and Test Team

- ⌚ Systems test engineer of [Mobile Wi-Max IOT](#), PCT, Extended Range, HO and HO+ Security test case validation.
- ⌚ Responsible for Network Infrastructure System Integration and [Protocol Conformance Testing of IEEE 802.16e](#).
- ⌚ Evaluated [1st ever WiMax Mobility HO scenario](#) with Security in real world with Multiple Mobile Stations.
- ⌚ Demonstrated [India's 1st real world Mobile WiMax HO](#) to operators in Chennai (BSNL and Idea).

ZTE Corporation • 3G Deployment • India • 2005 - 2006

Telecom Engineer • User Acceptance Testing

- ⌚ Accountable for [3G EvDO and CDMA RAN user acceptance testing](#), validation, installation and commissioning of ZTE MSC, BSC, BTS and other network entities at Reliance InfoComm, Mumbai and BSNL, Hyderabad.
- ⌚ Expertise in Packet Data testing, Coverage optimization, Handoff improvements and voice call quality verification.
- ⌚ Responsible for [live network commissioning](#), S/W upgrade and configuration of RAN and CN equipments.

Certifications

PMP, Cisco CCNA, IEEE CEU, CompTIA Network+, SDLC and STLC Certified Professional.

Education

Anna University • India • 2001 - 2005

- ⌚ Bachelor of Engineering in Electronics and Communication Engineering (E.C.E)
- ⌚ Graduated with honors • Ranked first in I, II and IV semesters.
- ⌚ Awarded at the state level for paper presentations on Fuzzy Logic and Bone Conduction.

Philanthropy

[Founder and Volunteer at GCP, 2013-Present](#): We raise funds over 150K every year to support underprivileged but talented kids to reach new heights in education, arts and sports.

[Volunteer at Benevity, 2014-2023](#): A CSR program to enrich knowledge of senior citizens on computers and smartphones. I contributed to forestation initiatives at Australian National Parks and awarded for my work ([click here](#)).

[Volunteer at Lotus, 1997-2013](#): Offered to teach English and Science to Govt. school kids during public holidays. Cleaned villages, mentored children and lit eco awareness to old-aged.
